 Should Fix:

## Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 3 blocking script resources and 5 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### [Remove render-blocking JavaScript:](#)

- <http://code.jquery.com/jquery-2.1.1.min.js>
- <http://cdnjs.cloudflare.com/ajax/libs/materialize/0.97.6/js/materialize.min.js>
- <http://fbsub.de/js/my.js?v=101>

[Optimize CSS Delivery](#) of the following:

## Mobile

- <http://fonts.googleapis.com/icon?family=Material+Icons>
- <http://cdnjs.cloudflare.com/ajax/libs/materialize/0.97.6/css/materialize.min.css>
- <http://cdnjs.cloudflare.com/ajax/libs/font-awesome/4.7.0/css/font-awesome.css>
- <http://fbsub.de/css/style.css?v=101>
- <http://fbsub.de/css/ac.css?v=102>

### Consider Fixing:

#### Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 11.3KiB (68% reduction).

- Compressing <http://fbsub.de/> could save 7KiB (64% reduction).
- Compressing <http://fbsub.de/css/style.css?v=101> could save 2.9KiB (87% reduction).
- Compressing <http://fbsub.de/js/my.js?v=101> could save 702B (51% reduction).
- Compressing <http://fbsub.de/css/ac.css?v=102> could save 656B (58% reduction).

#### Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- [http://fbsub.de/account/captcha.php?\\_CAPTCHA&t=0.36703100+1544525731](http://fbsub.de/account/captcha.php?_CAPTCHA&t=0.36703100+1544525731) (2 minutes)
- <https://www.googletagmanager.com/gtag/js?id=UA-100398865-1> (15 minutes)

## Mobile

- <http://pagead2.googlesyndication.com/pagead/js/adsbygoogle.js> (60 minutes)
- <https://www.google-analytics.com/analytics.js> (2 hours)

## Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 293B (27% reduction).

- Minifying <http://fbsub.de/css/ac.css?v=102> could save 293B (27% reduction).

## Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 187B (14% reduction).

- Minifying <http://fbsub.de/js/my.js?v=101> could save 187B (14% reduction).

## Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

## Mobile

- Only about 18% of the final above-the-fold content could be rendered with the full HTML response.
- Click to see the screenshot with only the HTML response: snapshot:8

### 4 Passed Rules

#### Avoid landing page redirects

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

#### Reduce server response time

Your server responded quickly. Learn more about [server response time optimization](#).

#### Minify HTML

Your HTML is minified. Learn more about [minifying HTML](#).

#### Optimize images

Your images are optimized. Learn more about [optimizing images](#).

## 99 / 100 User Experience

### Consider Fixing:

#### Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

## Mobile

The following text fragments have a small font size. Increase the font size to make them more legible.

- auto friend re...ست کی وخواست درخواست renders only 7 pixels tall.

### 4 Passed Rules

#### Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

#### Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

#### Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

#### Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen. Learn more about [sizing tap targets appropriately](#).
