98 / 100 Speed

⚠ Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- http://www.google-analytics.com/ga.js (2 hours)

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 975B (15% reduction).

- Minifying http://www.google-analytics.com/urchin.js could save 975B (15% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 2.9KiB (70% reduction).

- Compressing http://unionmillwright.com/unionyes.gif could save 2.9KiB (70% reduction).

✔ 7 Passed Rules

Eliminate render-blocking JavaScript and CSS in above-the-fold content

You have no render-blocking resources. Learn more about [removing render-blocking resources](#).

Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

75 / 100   User Experience

❗ Should Fix:

Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

Mobile

The following text fragments have a small font size. Increase the font size to make them more legible.

- A Life Time Me...ht Association and 6 others render only 7 pixels tall (19 CSS pixels) final.

- Millwright Uni...Phone Numbers and 15 others render only 7 pixels tall (19 CSS pixels) final.

- Some of the ma...g is required. and 24 others render only 7 pixels tall (19 CSS pixels).

- Email Login and 1 others render only 5 pixels tall (13 CSS pixels).

- New users renders only 4 pixels tall (10 CSS pixels).

- sign up renders only 4 pixels tall (10 CSS pixels).

- Everyone.net and 1 others render only 4 pixels tall (10 CSS pixels).

- powered by renders only 4 pixels tall (10 CSS pixels).

- Who are the Mi...t do they Do ? and 2 others render only 7 pixels tall (19 CSS pixels).

- He was the rec...f manufacture. and 60 others render only 7 pixels tall (19 CSS pixels).

🔸 Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target <input type="text" name="loginName"> and 1 others are close to other tap targets.

- The tap target <input type="submit" name="login"> is close to 3 other tap targets.

- The tap target sign up! and 1 others are close to other tap targets.
